

## **Free RePicture STEM Career Exploration Course**

Join other college students interested in science, technology, engineering, or math (STEM), recent STEM graduates, and exceptionally motivated high school students for a fun and educational course this summer. You'll:

- **Explore career opportunities while competing for prizes**
- **Improve the skills most valued by employers**
- **Grow your network and be part of a growing STEM community**

The 6-week course will meet in June and July. Sessions will be live and recorded to fit your schedule. The hours are flexible and students will typically spend 8-15 hours per week in webinars, group activities, and assignments. Join one career exploration track for all 6 weeks, or explore different options. Career exploration tracks include:

- **Protecting the Health of People and the Planet**
- **Green Energy**
- **Designing our Communities** (target: engineering & architecture)
- **Helping People Through Disaster Planning / Adapting to Climate Change**
- **Your STEM Choice** (find a topic that interests you!)

Weekly professional skills development topics will include:

- Finding Your Career Path
- Personal Branding
- STEM Writing and Presentation Skills
- Professional Networking

*"The **RePicture STEM Program** experience **added more value to the resume**, as well as providing links to their **RePicture.com Portfolio**. This experience and solid **RePicture work examples** are helpful and gives the new grad a step ahead." – company Hiring Manager*
