

Be a Change Maker and help students interested in engineering and science!

This summer RePicture is providing a **Free RePicture STEM Career Exploration Course** for students interested in science, technology, engineering, or math (STEM), recent STEM graduates, and exceptionally motivated high school students for a fun and educational course.

You can help a STEM student with just a couple minutes of your time. Opportunities include:

- ✓ Participate on a panel discussion about your profession
- ✓ Attend short student presentations or review their written work
- ✓ Be interviewed by a student about one of your projects
- ✓ Give a presentation about professional skills (e.g., resumes, technical writing, etc.)
- ✓ Support the professional development of your company's summer interns by allowing them to participate in the RePicture STEM Exploration Course

Volunteer [here](#), or go to bit.ly/RePicture2021

***Please also tell students about the Free RePicture STEM Career Exploration Course!
They can apply [here](#), or get more information at RePicture.com/students***
