GIRLS CREATE
TECH
TO IMPROVE
LIVES
OF OTHERS

Girls in middle school (typically age 10 to 14) will become scientists and engineers for a day. They can choose from workshops on chemistry, circuits, imaging & virtual reality, solar energy, programming & cybersecurity, or assistive devices; with a focus on how these technologies can be used to help their parents and grandparents.

Parents can attend a concurrent program with a mix of hands on experiences that can be duplicated at home and discover the future that awaits their daughters in Science, Technology, Engineering and Math (STEM). The parents program will conclude with a visit to the classrooms to see what the students have learned.

SHARE IDEAS
AND BUILD
PROJECTS
THAT
IMPROVE THE
LIVES OF
YOUR FAMILY
AND FRIENDS

The event supported by women and men in STEM professions from the following organizations

• **APTIV** •
